E_DEGREE – Spanish highest degree completed of education

	National Language	English Translation
<i>Question no. and text</i>	P30a ¿Cuáles son los estudios de <u>más alto nivel</u> oficial que Ud. ha cursado (con independencia de que los haya terminado o no)? Por favor, especifique lo más posible, diciéndome el <u>curso</u> en que estaba cuando los terminó (o los interrumpió), y también el nombre que tenían, entonces, esos estudios: (ej., 3 años de Estudios Primarios, Primaria, 5º de Bachillerato, Maestría Industrial, Preuniversitario, 4º de EGB, Licenciatura, Doctorado, FP1, etc.)	Q30a Which are the <u>highest level</u> official studies that you have done (whether you have finished them or not)? Please specify as much as possible, telling me the level (year) you were in, when you finished (or interrupted them), and also the name those studies had then (if different): (example: 3 years of Primary, Primary, first year of Junior High, Vocational Training, last year of High School, 4rth year of former Primary Education, College degree, PhD, first level of Vocational Training, etc)
<i>Codes/ Categories</i>	CURSO _____	SCHOOL YEAR _____
	NOMBRE _____	NAME of STUDIES _____
	NIVEL_ (<i>Codificar según T. de Estudios</i>) _____	DEGREE (<i>Code according Studies Show-Card</i>) _____
<i>Interviewer Instruction</i>	(ENTREVISTADOR: Si aún está estudiando, anotar el último curso que haya <u>completado</u> . Si <u>no</u> ha completado la Primaria, anotar <u>nº de años</u> que asistió a la escuela.)	(INTERVIEWER: If still studying, write down the last school year that he/she has <u>finished</u> . If he/she has <u>not</u> finished Primary, write down the <u>n. of years</u> that he/she went to school.)
<i>Translation Note</i>		
<i>Note</i>	The interviewer must write down the last year <u>completed</u> in school by respondent and the name of those studies. Then, he/she will write the appropriate code according to the Studies-Degree-Card. This code and the information given by respondent is revised later on by expert coders. The amount of examples given for the name of Spanish studies may seem too many, but, in Spain, it is necessary, due to the constant change in study plans in the last 25 years.

<i>Interviewer Instruction</i>	<i>Si aún está estudiando, anotar el último curso que haya completado. Si no ha completado la Primaria, anotar n° de años que asistió a la escuela.</i>	<i>If respondent is still studying, write down the last year completed. If he/she has not completed Primary, write down n. of years that went to school</i>
<i>Translation Note</i>		
<i>Note</i>	Code 06 "Vocational Training, high level", is a degree that gives access only to certain University careers and (University) degrees. Codes 07 and 08 are University degrees, but only 3 years Univ. degree, which is less qualification than a 5 year Univ. degree. For the time being, in Spain, most careers are 5 years, although a few are 4 years, and some (Technical Schools) are more than 5. Bologna system is being applied only three years ago, so there are not students in this sample who may have finished those studies.

ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SPISCO88 – Spouse, partner: occupation ISCO 1988

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables before recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

ISCO88 is used to code responses directly.
