Note on the 2012 ISSP Module Survey Conduct in South Korea

The 2012 ISSP module survey was conducted, as usual, as an integral part of the Korean General Social Survey (KGSS). The KGSS is a nationally represented annual social survey, which usually incorporates at least two topical modules in addition to its replicating core questionnaires. Included in the 2012 KGSS, besides ISSP, are the special topical modules < Network Social Capital in East Asia>, < Internet/SNS Usage and Addition in Korea> and < Mental Health in Korea >. The ISSP standard background variables are incorporated into the replicating core questionnaires section of the KGSS. In the 2012 KGSS, all ISSP variables (both topical and background) have been included.

Please name the **ISSP module** which the documentation refers to:

Family and Changing Gender Roles IV / ISSP 2012

Please name your **country**:
