ISSP 2012 Turkey

ISSP Background Variable Documentation

by

Markus Quandt, Evi Scholz and Insa Bechert GESIS

on behalf of the

ISSP Demographics Method Group

(Germany, Mexico, Norway, the Philippines, South Africa, Spain, Sweden, Switzerland, Taiwan, and the Archive)

Users of the international ISSP data file should have all relevant information to understand the construction of the ISSP background variables. Thus, the ISSP has decided to provide a documentation of its background variables and to regularly update this documentation (decisions of the ISSP General Meetings in 2005 and 2006). The information collected with this document will be published with the ISSP data files. Furthermore, it will help to discuss and decide on streamlining the ISSP background variables.

The Demographics Method Group asks you to provide information on all your ISSP background variables. The document at hand serves to collect and structure this information from ISSP members in a template.

Please note that, due to changes in the ISSP Background Variables, there are different versions of documentation templates to use, related to the respective ISSP study under consideration. The template at hand serves to document your national **ISSP 2011 and 2012** surveys.

The document consists of three sections: Section 1 of this documentation refers to basic elements: source description, information on filters and routing, and construction information. In section 2, as an example, we present the relevant information for the variable UNION (Trade union membership) from Germany. Section 3 finally offers the documentation template for all ISSP background variables valid for the ISSP modules 2011 and 2012.

If you have any questions on the documentation, please do not hesitate to contact us:

isspservice@gesis.org

1. Basic Elements

For each of the variables listed in section 3 below, please give the following information as applicable.

❖ Source description

- Please give the **question no./position/name(s)** used in your field questionnaire and report additional information sources, for example, if interviewer observation was used instead of asking questions to respondents. If your ISSP is run with a larger survey and the background variable is taken from this survey, then refer to that (those) source question(s). Please make a **note** from which survey the question(s)/variable(s) come(s) (see below).
- Please give the text of the **original question(s)** exactly as used in your field questionnaire and **in your national language**.
 - Please include all **response categories** of the original field questionnaire.

- Please give **interviewer instructions** if necessary to understand the generation of response codes.
- Please **translate original questions, response categories and interviewer instructions** into English.
- Please provide **notes** if needed. Notes can address both possible translation issues (**translation note**) and country specific particularities of question background, of variable generation or of the meaning of individual response categories (**note**).
- ❖ **Filter Variables and Conditions:** If any variables cover only part of the sample, please list the conditions (questions/variables and categories/codes) used to define the *excluded cases*. In other words, report the conditions which lead to a ‘not applicable’ code in the variable following the filter.
- ❖ **Construction/Recoding**
 - Please report how the codes of the ISSP target variable were derived from your source data.
 - Please use a table of correspondence with source and target codes (see the example in section 2 and tables in section 3).
 - If construction of ISSP target codes involves more than simple 1-1 relationships between source and target codes, please use roughly Boolean syntax as shown in the example 2 below. Command syntax of common statistics programs is also welcome. Just put the syntax used into the “Optional: Recoding Syntax” box if you consider that it will increase comprehensibility and transparency.
 - Please always (also for country specific variables) report how the ISSP missing values (not applicable-NAP, no answer-NA, don’t know-DK) were filled.
- ❖ **Complementary information (see last page)**
 - Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country’s field questionnaire delivered with your national ISSP data file, then just tick the box on the last page of this document. (PDF or MS Word format preferred.)
 - Please also supply frequency tables with absolute and relative frequencies, missing values *included*, for **all source** variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)
 - If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

2. Example

The German example for the variable UNION is constructed from two variables referring to two questions in the German field questionnaire.

UNION – Trade union membership

	National Language	English Translation
<i>Question no. and text</i>	#1 Darf ich Sie fragen, ob Sie derzeit Mitglied in einer Gewerkschaft sind?	#1 May I ask you whether you are currently a member of a trade union?
<i>Codes/ Categories</i>	1. Ja, bin Mitglied	1. Yes, I am member
	2. Nein, bin kein Mitglied	2. No, I am not member
	9. Keine Angabe*	9. No answer*
	0. Nein, Befragter will Frage nicht beantworten*	0. Respondent refuses to answer*
<i>Question no. and text</i>	#2 Waren Sie früher einmal Mitglied in einer Gewerkschaft?	#2 Were you once a member of a trade union?
<i>Codes/ Categories</i>	1. Ja	1. Yes
	2. Nein	2. No
	8. Weiß nicht	8. Don't know
	9. Keine Angabe*	9. No answer*
<i>Note</i>	Falls Befragter aktuell kein Gewerkschaftsmitglied ist; „nein“ in #1	If respondent not currently union member; no in #1
<i>Interviewer Instructions</i>	—	
<i>Translation Note</i>	—	
<i>Note</i>	Current and former union membership taken from ALLBUS 2010 Answer categories marked by an asterisk are not read aloud.	

Filter Variable(s) and Conditions:

Former membership (#2) not asked if respondent currently member (#1=1)
--

Construction/Recoding:

Country Variable Codes/ Construction Rules	→UNION
If (#1=1)	1. Yes, currently
If (#2=1)	2. Yes, previously but not currently
If (#1=2 and #2=2)	3. No, never

If (#1=0)	7. Refused
Else	9. No answer

3. Variable List

In the following you will find forms to ease documentation of the points described in section 1 above.

Some Hints to Fill in the Forms

- Please fill in the forms on the screen and return the file to <isspservice@gesis.org> – please do *not* return a printout using paper and pencil!
- In general, please feel free to be flexible in using the forms. If necessary adopt them to your reporting needs. In particular:
 - Please insert as many additional fields as needed, e.g. add lines if your country variable has more categories than the template provides.
 - Please skip fields not needed, e.g. skip ‘note’ lines if no note is required.
 - If individual response categories require separate notes, insert as many additional lines as necessary *below* the respective category.
 - If your field questionnaire has more than one language version, please replicate the complete ‘National Language - English Translation/Note’ block as often as needed.
- The question numbers should refer to the numbers of your original field questionnaire.
- For variables with continuous data (AGE, WRKHRS...), please list the lowest and the highest valid codes empirically found in your country’s data and the various non-response codes, e.g. NAP (not applicable), DK (don’t know); if additional non-response codes occur in your data, such as ‘refused’, please add.
- If source variables are relevant for *several* ISSP target variables, please copy the information for the source variables each time to offer a complete documentation of the individual ISSP target variable.

Please name the **ISSP module** which the documentation refers to (e.g., “*Health and Health Care / ISSP2011*”):

Family, ISSP 2012

Please name your **country**:

Turkey

SEX - Sex of respondent

	National Language	English Translation
<i>Question no. and text</i>	D.01. Cinsiyet	Sex
<i>Codes/ Categories</i>	1-2	1-2
	Erkek-Kadın	Male-Female
<i>Interviewer Instruction</i>	(Sormayın, Kendiniz Kodlayın)	(Do not ask, code yourself)
<i>Translation Note</i>		
<i>Note</i>		

Construction/Recoding:

Country Variable Codes (in translation)	→ SEX
1. Erkek	1. Male
2. Kadın	2. Female
	9. No answer

BIRTH – Year of birth

This question can be asked as an alternative to asking about AGE. If BIRTH is not asked directly, it must be computed by DATEYR ‘year of interview’ minus AGE ‘age of respondent’.

	National Language	English Translation
<i>Question no. and text</i>	D.02 DOĞUM YILINIZI öğrenebilir miyim?	May I learn the year of your birth?
<i>Codes/ Categories</i>	99. Cevap Yok	No answer
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→BIRTH
<i>Construction</i>		
<i>Codes</i>	1919	[MIN BIRTH]
	1994	[HIGH BIRTH]
	(99=9999)	9999. No answer

Optional: Recoding Syntax

--

AGE - Age of respondent

This question can be asked as an alternative to asking about BIRTH. If AGE is not asked directly, it must be computed by DATEYR ‘year of interview’ minus BIRTH ‘year of birth’.

	National Language	English Translation
<i>Question no. and text</i>		No question asked
<i>Codes/ Categories</i>		
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>		

Construction/Recoding: (list lowest, highest, and ‘missing’ codes only, replace terms in [square brackets] with real numbers)

	Country Variable Codes/Construction Rules	→AGE
<i>Construction</i>	2013-BIRTH	
<i>Codes</i>	17	[MIN AGE]
	92	[HIGH AGE]
		999. No answer

Optional: Recoding Syntax

EDUCYRS - Education I: years of schooling

--

	National Language	English Translation
<i>Question no. and text</i>	D.03. Eğitim durumunuz nedir? İlk orta ve yüksek öğretimde, meslek öğrenmek hariç, kaç yıl geçirdiniz?	What is your education? How many years have you spent in primary, secondary and university education other than professional training?
<i>Codes/ Categories</i>	Yıl sayısı.....	Number of years.....
	0. Resmi bir eğitim almamış	0. No formal education
	95. Halen bir okula devam ediyor.	95. Still continuing to a school
	96. Halen Üniversite'ye devam ediyor.	96. Still continuing to university education
	97. Bilmiyor / Anımsayamıyor	97. Does not know / Can't remember
	98. Kuran kursu	98. Course of Koran
	99. Cevap yok	99. No answer
<i>Interviewer Instruction</i>	Belirtilen yıl sayısı yazılacak. Eğer görüşülen kişi "ilkokul mezunuyum" derse "5", "ortaokul mezunuyum" derse "8", "lise mezunuyum" derse "11", "üniversite mezunuyum" derse "15" yıl yazılacak. "Tıp doktoru" derse "17" yıl, "Yüksek Mühendis / Yüksek Mimar" derse 16 yıl olarak kaydedin.	Take a note of the year given. If the respondent says primary school graduate then code 5, junior high code 8, high school code 11, university graduate code 15. If the respondent is a medical school graduate then code 17, engineer or architect with an MS code 16.
<i>Translation Note</i>	Engineer or architect with an MS degree literally can be translated as high engineer/architect. So, high engineer/architect answers are coded as 16.	
<i>Note</i>	Open ended answers coded as education years coded into column 66 (d03)	

Filter Variable(s) and Conditions:

--

Country Variable Codes/Construction Rules	→ EDUCYRS
0=0. No formal education 98=0. Course of Kuran	0. No formal schooling, no years at school
1=1. One year	1. One year
95=MISSING. Still at school	...
96=15. Still at college/university/in training	
97=98. Don't know / don't remember	98. Don't know
99=99. No idea/Don't know/ No answer	99. No answer

Optional: Recoding Syntax

--

TR_DEGR - Country-specific highest completed degree of education

	National Language	English Translation
<i>Question no. and text</i>	D.04. Eğitim Kademeleri /Varılan en yüksek eğitim düzeyi	Levels of education / Highest degree being held by the respondent
<i>Codes/ Categories</i>	0. Hiçbir resmi eğitim almamış.	0. No formal qualification
	1. İlkokul mezunu	1. Lowest formal qualification
	2. Ortaokul mezunu	2. Above lowest qualification
	3. Lise mezunu	3. Higher secondary completed
	4. Lise'den mezun olup yüksek öğretime devam etmiş ama bitirememiş.	4. Above higher secondary level
	5. Üniversite mezunu	5. University degree completed
	99. Fikri yok / Bilmiyor / Cevap Yok	99. NR
<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	No separate question was asked coded directly from D.04.	

Filter Variable(s) and Conditions:

--

	0. NAP (Code 3 in WORK)

Optional: Recoding Syntax

--

ISCO88 - Occupation ISCO 1988

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	D.13. Mesleğiniz nedir? ("İşsiz", "Ev Kadını", "Emekli" veya "Hiç bir zaman işim olmadı" yanıtını verenlere) Yani ana işinizin ismi nedir ya da ünvanınız nedir?	What is your occupation? (Ask to respondents who answer as "Unemployed", "Retired", "Never has a paid-work") So, what is your title?
<i>Codes/ Categories deviating from ISCO88 / ISCO88-COM</i>		
<i>Interviewer Instruction</i>	(Açık yanıt almaya çalışın, söyleneni aynen yazın)	(Try to get a clear answer and write everything said verbatim)
<i>Translation Note</i>		
<i>Note</i>	Open ended question. Answers are coded according to (ISCO) occupation descriptions into ISCO88	
<i>Use of ISCO</i>	ISCO88 (ILO)	<input checked="" type="checkbox"/>
	ISCO88-COM (EU variant)	<input type="checkbox"/>
	Other ISCO88 variant	<input type="checkbox"/> → please specify _____

SPISCO88 – Spouse, partner: occupation ISCO 1988

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	D.20. Eşinizin ya da birlikte yaşadığımız arkadaşınızın mesleği nedir? ("İşsiz", "Ev Kadını", "Emekli" veya "Hiç bir zaman işim olmadı" yanıtını verenlere) Yani ana işinin ismi nedir ya da ünvanı nedir?	What is your spouse or partner's occupation? (Ask to respondents who answer as "Unemployed", "Retired", "Never has a paid-work") So, what is his/her title?
<i>Codes/ Categories deviating from ISCO88/ ISCO88-COM</i>		
<i>Interviewer Instruction</i>	(Açık yanıt almaya çalışın, söyleneni aynen yazın)	(Try to get a clear answer and write everything said verbatim)
<i>Translation Note</i>		
<i>Note</i>	Open ended question answers are then coded according to (ISCO) occupation descriptions into SPISCO88	
<i>Use of ISCO</i>	ISCO88 (ILO)	<input checked="" type="checkbox"/>
	ISCO88-COM (EU variant)	<input type="checkbox"/>
	Other ISCO88 variant	<input type="checkbox"/> →please specify

Construction/Recoding:

Country Variable Codes/Construction Rules	→ SUBSCASE
0. NAP, no substitution in this survey	0. NAP, no substitution in this survey
	1. Case from original sample
	2. Case substituted

Optional: Recoding Syntax

--

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No	[]
	Yes	[]
<i>Weight to adjust for non-response bias</i>	No	[]
	Yes	[] → please specify variables used for calculation of weight
<i>Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?</i>	No	[] → please specify target population represented by sum of all case weights
	Yes	[]
<i>Note</i>		

Construction/Recoding:

Country Variable Codes/Construction Rules	→ WEIGHT
	1. No weighting

MODE – Administrative mode of data-collection

<i>Note</i>

30. SC, arrives with interviewer, interviewer attending	10. F2f/PAPI, no visuals
	11. F2f/PAPI, visuals
	12. F2f/PAPI, respondent reading questionnaire
	13. F2f/PAPI, interpreter or translator – no visuals
	14. F2f/PAPI, interpreter or translator – visuals
	20. CAPI, no visuals
	21. CAPI, visuals
	22. CAPI, respondent reading questionnaire (paper or on monitor)
	23. CAPI, interpreter or translator – no visuals
	24. CAPI, interpreter or translator – visuals
	30. SC, arrives with interviewer, interviewer attending
	31. SC, arrives with interviewer, drops-off, picks up later
	32. SC, arrives with interviewer, drops off, mailed back by R
	33. SC, mailed to, completed by R and hold for pick up
	34. SC, mailed to, mailed back by R
	40. CASI, self-completion, computer-assisted

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

ISCO88 is used to code responses directly.

Conversion of national coding scheme to ISCO88. Attached file: ZZZZZZ.ZZZ.
