## FR\_OCC\_R - R: Occupation PCS

	National Language	English Translation
<i>Question no. and text</i>	30. Si vous travaillez, quelle votre profession actuelle ? Si vous ne travaillez plus, quelle était votre dernière profession.	30. If you are working, what is your current occupation? If you don't have a job, what is your last occupation.

**Filter Variable(s) and Conditions:**

IF WORK = 1 OR 2

**ISCO88 - Occupation ISCO 1988**

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

<i>Codes/ Categories deviating from ISCO88 / ISCO88-COM</i>	Nomenclature des professions et catégories socioprofessionnelles (PCS 1994)	French classification of the occupations and the social categories (PCS 1994)

<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	Because of uncomplete information to describe the occupation, a code with 1 zero at the end corresponds to the 2 digits ISCO code and a code with 2 zeros at the end corresponds to the one digit ISCO code.

## FR\_OCC\_SP - SP: Occupation PCS

	National Language	English Translation
<i>Question no. and text</i>	40. Et quelle est sa profession ou sa dernière profession ?	40. What is his occupation or last occupation?
<i>Codes/ Categories deviating from ISCO88 / ISCO88-COM</i>	Nomenclature des professions et catégories socioprofessionnelles (PCS) 1994	French classification of the occupations and the socioprofessional categories (PCS 1994)

**SPISCO88 – Spouse, partner: occupation ISCO 1988**

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO88-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO88 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO88 codes here. But please report if your country **adds** or **changes** codes compared to ISCO88, if any.

Occupations should be coded on the 4-digit level of ISCO88. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.
