2013 ISSP Background Variable Documentation

South Korea

April, 2013

Note on the 2013 ISSP Module Survey conducted in South Korea

The 2013 ISSP module survey was conducted, as usual, as an integral part of the Korean General Social Survey (KGSS). The KGSS is a nationally represented annual social survey, which usually incorporates at least two topical modules in addition to its replicating core questionnaires. Included in the 2013 KGSS, besides ISSP, are the special topical modules <Social Risks in Korea>, <Internet Usages in Korea>, and <Job Attainment in Korea>. The ISSP standard background variables are incorporated into the replicating core questionnaires section of the 2013 KGSS. In the 2013 KGSS, all ISSP variables (both topical and background) were included.

Please name the **ISSP module** which the documentation refers to:

Note	Individuals are sampled by the three-stage area probability sampling method. The total number of sample blocks (or clusters) is 200. The total sample blocks are distributed to 16 *do*'s or *si*'s at the province level, proportionate to the distribution of households in Korea.

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

Design weight to adjust for unequal selection probabilities	**No**	**[ ]** √
	Yes	[ ]
Weight to adjust for non-response bias	**No**	**[ ]** √
	Yes	[ ] → please specify variables used for calculation of weight
Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?	No	**[ ]** → √ please specify target population represented by sum of all case weights
	Yes	[ ]

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

[ ] Already included in field questionnaire provided with the country data file.

[x] Attached file: XXXXX.XXX

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** *source* variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: YYYYYY.YYY.

6. Correspondence list ISCO88<->national occupation codes

If your country derives ISCO88 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO88 codes. (MS Word or simple ASCII file preferred.)

[x] ISCO88 is used to code responses directly.

[ ] Conversion of national coding scheme to ISCO88. Attached file: ZZZZZZ.ZZZ.
