#### ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do not enter standard ISCO08 codes here, but report any deviations. However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!

Occupations should be coded on the <u>4-digit level</u> of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

Note		
Note	WKSUP is only asked of respondents. If they are temporarily or permanently not	
	at work, WKSUP is then asked about their spouse instead. This amounts to a	
	handful of cases each year, and is not included due to scarcity.

#### SPISCO08 - Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do not enter standard ISCO08 codes here, but report any deviations. However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!

Occupations should be coded on the <u>4-digit level</u> of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

## **SUBSCASE** – Case substitution flag

	National Language	English Translation
Question no. and text		
Codes/ Categories		
Interviewer Instruction		
Translation Note		S
Note	SUBCASE is not used in US data. The G collection.	SS used no substitution in its data

Filter Variable(s) and Condition
----------------------------------

**Construction/Recoding:** 

Country Variable Codes/Construction Rules	→ SUBSCASE
A.	0. NAP, no substitution in this survey
• X	1. Case from original sample
	2. Case substituted

#### **WEIGHT** – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

Design weight to adjust for unequal	No	[]
selection probabilities	Yes	
Weight to adjust for non-response bias	No	
	Yes	[ ] → please specify variables used for calculation of weight
Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?	No Yes	[] → please specify target population represented by sum of all case weights
Note		s into consideration a) the sub-sampling of other of adults in the household. It also all sample size.

#### **Construction/Recoding:**

Country Variable Codes/Construction Rules	→ WEIGHT	
	1. No weighting	

#### **MODE** – Administrative mode of data-collection
