ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO08 codes here. But please report if your country **adds** or **changes** codes compared to ISCO08, if any.

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	Q254 Wat is u huidige beroep (die benaming of titel van u werk)?	Q254 What is your current occupation? (The name and title of your main job)?

SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the spouse's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Please report which kind of ISCO code you apply. The most common ones are the code developed by the International Labour Organisation (ILO) and the variant developed for the European Union (EU), ISCO-COM. If you apply another variant such as ISCO08-CIS developed by the Statistical Committee of the Commonwealth of Independent States, then please specify.

Please do **not** enter **standard** ISCO08 codes here. But please report if your country **adds** or **changes** codes compared to ISCO08, if any.

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, the 4-digit code 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit code in the data file is 110 (Armed Forces).

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

	National Language	English Translation
<i>Question no. and text</i>	Q.244 Wat is/was u lewensmaat/eggenoot se beroep)?	Q.244 What is/ was your spouse's/ partners occupation? (The name and title of your main job)?

Given the apartheid history in South Africa, the race categorization of white, black (African), Indian and coloured is very commonly understood in South Africa. This is the most common variable used to categorise various the races. Among the African people there are various tribes, and the most common way –although this is seldom used-to ethnise the African group would be to use the African language that they speak, i.e. Sesotho, Setswana, Sepedi, Siswati, IsiNdebele, IsiXhosa, IsiZulu, Xitsonga, Tshivenda.

In terms of the White groups (Europeans) it is fairly uncommon to ask origin country and the only further distinction is again based on language, that is the Afrikaans speakers and

the English speakers. Coloured people and the Indian population are generally treated as a homogenous group with no further distinction.

Construction/Recoding:

Country Variable Codes/Construction Rules	➔ Marital
If q224=1/2/3 then marital=1	1. Married
	2. Civil partnership
If q224=4 then marital=3	3. Separated from spouse/civil partner (still legally married/still legally in a civil partnership)
If q224=5 then marital=4	4. Divorced from spouse/legally separated from civil partner
If q224=6 then marital=5	5. Widowed/civil partner died
If q224=7 then marital=6	6. Never married/never in a civil partnership
If q224=9 then marital=8	8. Don't know
If q224=8 then marital=7	7. Refused
If q224=. then marital=9	9. No answer

Optional: Recoding Syntax

```
RECODE q224 (1 THRU 3=1) (4=3) (5=4) (6=5) (7=6) (8=7) (9=8) (SYSMIS=9)  
(ELSE=Copy) INTO marital. VARIABLE LABELS marital 'R: Marital status'.
```

ISSP 2014 South Africa

URBRURAL – Place of living: urban – rural

This question derived from geotype variable-caution

	National Language	English Translation
<i>Question no. and text</i>	Derived from geotype variable	Derived from geotype variable
<i>Codes/ Categories</i>		1=Urban, formal
		2 =Urban, informal
		3 =Tribal
		4 =Rural, formal
<i>Interviewer Instruction</i>		99=NA
<i>Translation Note</i>		
<i>Note</i>

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

<i>Design weight to adjust for unequal selection probabilities</i>	No <input type="checkbox"/> Yes	<input type="checkbox"/> <p>Explicit stratification variables: Province, population group and geography type (viz. urban formal, urban informal, tribal and rural formal, including commercial farms).</p> <p>The EA (census enumerator area) is used as PSU (primary sampling unit) and the number of households (HHs) in the EA as the MOS (measure of size). EA's are drawn within the explicit strata pps and a fixed number of households drawn per drawn EA. Within each drawn HH one person 16 years or older is drawn at random using Kish's grid.</p>
<i>Weight to adjust for non-response bias</i>	No <input type="checkbox"/> Yes	<input type="checkbox"/> <p>Non-response adjustment = number of drawn HHs per EA / number of responding HHs (i.e. where a person 16+ is successfully interviewed) provided that at least 50% of households responded. Otherwise two similar (i.e. in the same explicit stratum) and neighbouring EAs are combined and a combined adjustment factor calculated.</p> <p>Person and household weights are benchmarked using the SAS CALMAR macro and province, population group, gender and 5 age groups (i.e. 16-24, 25-34, 35-49, 50-50 and 60 and older) as benchmark variables for persons and province and population group of the respondent in the household for households as benchmark variables. The marginal totals for the benchmark variables are obtained from the applicable midyear estimates as published by Statistics South Africa. In other words, the estimated South African population for the applicable year is used as target population.</p>
<i>Sum of the final weights changes net sample size (rescaling)</i>	No Yes	<input type="checkbox"/> No, not explicitly but only implicitly <p>I assume that this question relates to whether sample sizes are rescaled with the view to do cross-tabulating analyses using STATA. Sub-class analyses are done by using SAS surveymeans, using the "domain" facility.</p> <input type="checkbox"/> → please specify target population of rescaling
<i>Note</i>		

MODE – Administrative mode of data-collection

<i>Note</i>	All interviews were done by paper and pencil, with an interpreter and visuals=14

	21. CAPI, visuals
	22. CAPI, respondent reading questionnaire (paper or on monitor)
	23. CAPI, interpreter or translator – no visuals
	24. CAPI, interpreter or translator – visuals
	30. SC, arrives with interviewer, interviewer attending
	31. SC, arrives with interviewer, drops-off, picks up later
	32. SC, arrives with interviewer, drops off, mailed back by R
	33. SC, mailed to, completed by R and hold for pick up
	34. SC, mailed to, mailed back by R
	40. CASI, self-completion, computer-assisted

4. Country Questionnaire

Please provide the part(s) of your country questionnaire that relate(s) to the background variables reported in this template. If these variables are already covered by your country's field questionnaire delivered with your national ISSP data file, then just tick on the last page of this document. (PDF or MS Word format preferred.)

Already included in field questionnaire provided with the country data file.

Attached file: SASAS 2014 Q1.pdf

5. Frequency Distributions of Source Variables

Please supply frequency distributions with absolute and relative frequencies, missing values *included*, for **all** source variables. *Source variables* are the country-specific variables **before** recodes into ISSP standard variables are done. (MS Word or simple ASCII file preferred.)

Attached file: ISSP CITIZENSHIP FREQUENCIES.

6. Correspondence list ISCO08<->national occupation codes

If your country derives ISCO08 codes from a national occupation coding scheme, please supply a correspondence list of national codes and ISCO08 codes. (MS Word or simple ASCII file preferred.)

ISCO08 is used to code responses directly.

Conversion of national coding scheme to ISCO08. Attached file:
