PARTY_LR - Party voted for in last general election: left-right scale

	National Language	English Translation
Question no. and text	Constructed based on ES_PARTY	
Codes/ Categories		
Interviewer Instructions	Data to construct PARTY_LR come from the mean location of parties in the left-right scale in surveys CIS Study 3156 (October 2016) and CIS study 3164 (January 2017), as well as from the 2014 Chapel Hill Expert Survey (see appendix). See Liesbet Hooghe, Ryan Bakker, Anna Brigevich, Catherine de Vries, Erica Edwards, Gary Marks, Jan Rovny, Marco Steenbergen, Milada Vachudova (2010), "Reliability and Validity of Measuring Party Positions: The Chapel Hill Expert Surveys of 2002 and 2006," European Journal of Political Research, 42 (4): 684-703. Parties with codes 6 to 13 are regionalist/nationalist parties (or coalitions that include this type of party) and, thus, their main axis of identification/electoral competition is not only the left-right one, but also centre-periphery.

ANEX

The data collected in Spain for the ISSP module (accessible at www.cis.es) contains a question that asks the respondent to state who the main wage earner in the household is. Interviewers are requested to refer the questions related to work to the main wage earner when the respondent has never done any paid work (3 in WORK/question 73).

In addition to that, in order to avoid asking the same questions twice, the instruction given to interviewers is to skip those questions in case the respondent has never worked and the main earner is the partner/spouse (since they are going to be answered in the questions regarding the spouse/partner work: SPWRKHRS, SPEMPREL, etc.).

This is the instruction given to interviewers after P73 (WORK):
