EDUCYRS - Education I: years of schooling

	National Language	English Translation
<i>Question no. and text</i>	EDU2 'Combien d'années d'études à plein temps avez-vous accomplies depuis la première année primaire? Veuillez ne pas compter les éventuelles années d'apprentissage ni les années répétées.	EDU2 For how many years were you in fulltime education? Don't count the time you possibly spent doing an apprenticeship or repeating years.
<i>Codes/ Categories</i>	i4 NUMERIC -1. Ne sait pas	i4 NUMERIC -1. Don't know
<i>Interviewer Instruction</i>	Introduire le nombre d'années. Arrondir au nombre d'années supérieur ou inférieur le plus proche. Un apprentissage ne compte pas ici.	Indicate the number of years. Round up or down to the nearest year. Don't include here the years of apprenticeship.
<i>Translation Note</i>	As a majority of the Swiss population does an apprenticeship, it is important to avoid its inclusion here. It is asked separately in the following question.	
<i>Note</i>		
<i>Question no. and text</i>	EDU2 Wie viele Jahre Ausbildung haben Sie seit der ersten Primarschulklasse absolviert? Zählen Sie bitte alle Vollzeit Aus- und Weiterbildungen dazu, nicht aber eine eventuelle Lehrzeit und immer ohne wiederholte Jahre.	EDU2 For how many years were you in fulltime education? Don't count the time you possibly spent doing an apprenticeship or repeating years
<i>Codes/ Categories</i>	NUMERIC 2 -1. Ne sait pas	NUMERIC 2 -1. Don't know
<i>Interviewer Instruction</i>	Anzahl Jahre eingeben. Auf die nächste Zahl Auf- oder Abrunden. Total= 9 Jahre. Eine Lehre zählt nicht dazu.	Indicate the number of years. Round up or down to the nearest year. Don't include the years of apprenticeship.
<i>Translation Note</i>	As a majority of the Swiss population does an apprenticeship, it is important to avoid its inclusion here. It is asked separately in the following question.	
<i>Note</i>		
<i>Question no. and text</i>	EDU2 Quanti anni di studio a tempo pieno ha completato dalla prima elementare in poi? Non conti né gli anni di apprendistato né gli anni ripetuti.	EDU2 For how many years were you in fulltime education? Don't count the time you possibly spent doing an apprenticeship or repeating years
<i>Codes/ Categories</i>	NUMERIC 2 -1. Ne sait pas	NUMERIC 2 -1. Don't know
<i>Interviewer Instruction</i>	Annotare numeri d'anni. Arrotondare la risposta in più o in meno all'anno intero più prossimo. Non prendere in conto un'apprendistato.	Indicate the number of years. Round up or down to the nearest year. Don't include here the years of apprenticeship.
<i>Translation Note</i>	As a majority of the Swiss population does an apprenticeship, it is important to avoid its inclusion here. It is asked separately in the following question.	
<i>Note</i>		

<i>Question no. and text</i>	EDU3 Et le cas échéant combien d'années d'apprentissage avez-vous accomplies, sans compter d'éventuelles années répétées?	EDU3 And, if appropriate, how many years did it take to do this apprenticeship, not including any possible repeated years?
<i>Codes/ Categories</i>	NUMERIC 2 -1. Ne sait pas -2. Pas de réponse -5 N'a pas fait d'apprentissage	NUMERIC 2 -1. Don't know -2. No answer -5 No apprenticeship achieved
<i>Interviewer Instruction</i>	Introduire le nombre d'années. Arrondir au nombre d'années supérieur ou inférieur le plus proche.	Indicate the number of years. Round up or down to the nearest year.
<i>Translation Note</i>		
<i>Note</i>		
<i>Question no. and text</i>	EDU3 Und falls Sie eine Lehre gemacht haben, wie viele Jahre hat diese gedauert, ohne eventuelle wiederholt Jahre?	EDU3 And, if appropriate, how many years did it take to do this apprenticeship, not including any possible repeated years?
<i>Codes/ Categories</i>	i4 NUMERIC -1. Weiss nicht -2. Keine Antwort -5 Hat keine Lehre gemacht	i4 NUMERIC -1. Don't know -2. No answer -5 No apprenticeship achieved
<i>Interviewer Instruction</i>	Anzahl Jahre eingeben. Auf die nächste Zahl Auf- oder Abrunden.	Indicate the number of years. Round up or down to the nearest year.

ISSP 2017 Switzerland

ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [9998] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

Information about the parties in Switzerland in ISSP 2016-2017

CH_PRTY

The last national elections were in 2015; and the categories were adjusted accordingly. Compared to ISSP 2015, one party was added to the list : "Solidarity". Overall, there was no substantive change in the 2015 federal election. The Swiss People's Party has become more important. Left (Green Party) and right ecology (Green Liberal Party) have lost many votes. The far left recovers one seat (for the Solidarity party, which was added in our list). The fusion within the Liberals and the Radicals seems to have been achieved: there is no longer any mention of the old parties (which was kept in our proposed list).

The Liberals ==> Right, conservative

After some years of political alliance between the Radicals and the much smaller Liberal Party, in January 2009, they merged to form the new party "FDP.The Liberals". The former FDP was founded in 1894, growing out of the liberal, radical and democratic movements that dominated the first decades of the federal state. The Liberal Party as well has roots going back as far as in the 19th century and was developed mainly in French-speaking Switzerland.

Very much like its precursors, "FDP. The Liberals" relies on classical liberalism. It has two members in the Federal Council and 30 seats in the National Council. With a number of 130000, it has by far the most members of all Swiss parties.

FDP.The Liberals too, they form their own faction in the National Council and are assigned 11 seats in the Council of States.

Christian-Democratic People's Party ==> Centre-right, conservative

This party has been founded by conservative Catholics, who lost the short civil war of 1847. Nevertheless, they are currently also present in Protestant cantons, with more eccentric positions. They claim for a social market economy. It is the second largest party in terms of membership, but the smallest of the four-party coalition government.

They form a faction of 31 seats with the evangelical people's party, in which they hold 28 seats. In the Council of States they are assigned 13 seats.

Social Democratic Party (= social democrats) ==> Centre-left

As a merge of several cantonal workers' parties, the socialist/socialdemocratic Party has been founded in 1888. It is currently the most pro-european party in Switzerland. It ranks fourth in terms of membership, but the second biggest in terms of votes and seats (46) in the National Council. There, they form their own faction. In the Council of States they are represented with 11 seats.

Swiss People's Party ==> Right, conservative

Founded in 1936 from an association of farmers and artisans, this party became more and more populist, especially its right wing. Since the 1990's, they adopted certain anti-foreigner positions from the far-right. Quite closely linked to the fact that they are represented by only one member in the Federal Council (government), they consider themselves as an opposition party. In terms of

their share of total votes, they form the biggest Swiss party, while they are outreached by the Christian Democrats and the "FDP.The Liberals" in terms of membership. The national elections of 2011 marked the end of a 20-year period of steady growth in their share of total votes with a climax of 28.9% in the 2007 national elections. They form their own faction in an alliance with the Lega (2 Seats) and a resulting total of 56 seats in the National Council (total: 200 seats). In the Council of States they've gained 5 out of 46 seats.

Conservative Democratic Party of Switzerland ==> Centre right

The Conservative Democratic Party was created in November 2008 as a split of the Swiss People's Party.

The Swiss People's Party (UDC, SVP) becoming more and more populist, a fraction of this party split from it, creating the more moderate "Conservative Democratic Party of Switzerland". It has one Federal Councillor (Eveline Widmer-Schlumpf), 9 seats in the National Council and one in the Council of the States. They put forward conservative values and economic liberalism. This party is represented by its own faction in the national parliament.

Christian Social Party ==> Centre-left, liberal

In 1997, merging cantonal groups have founded the Christian-social Party to create a new party on the national level. As opposed to other Christian parties, they are very liberal on societal issues such as abortion and homosexual partnerships. They share social democratic views on redistribution and take strong environmentalist positions, why they may be labelled a "leftist Christian party". After 2011 elections, they hold no seats in national parliaments.

Swiss labour party ==> Far left

This party was founded in 1944 by the illegal Communist Party of Switzerland. In 2011, they lost their only seat in the parliament and are no longer represented.

Green party ==> Left, centre left

Born from the environmental movement, this party was found in 1983 and gained strength throughout the 1980s. It is the strongest party not represented in the national executive government. They currently hold 15 seats in the national parliament and form their own faction. In the Council of States they are represented with 2 seats.

Green liberal party ==> Centre, liberal

Founded in 2007, they immediately won a seat in the Council of the states and three in the national council. Since then, they successfully expanded in the cantonal elections. Sharing the idea of environmentalism with the Green Party, its party program differs strongly with respect to regulation of the economy. It aims to combine moderate economic liberalism, liberalism on civil liberties and environmental sustainability.

They represent 12 seats in the National Council and form their own faction.

Swiss democrats ==> Far right

Founded in 1975 as a split from the Evangelical People's Party. Beyond their social conservatism and christian values, they are eurosceptic and support strong anti-foreigner positions.

No more in the national parliament since end 2007 (where they held one seat in the council of the states).

Federal Democratic Union ==> Far right

The Christian, national-conservative Federal Democratic Union lost their only seat in parliament in the 2011 elections, while they won two seats in the 2003-election and one in 2007. They stand for value-oriented, biblical positions and strongly refuse European integration of Switzerland.

Evangelical People's Party ==> Centre

Founded in 1919, this small protestant party stands rather centre-left on some issues (redistribution, education, immigration, environment), but is conservative on others (abortion, family, euthanasia). The economic position is centrist. Alliance with the Christian Democrats, being in the same faction at the national level.

Lega dei Ticinesi ==> Far right

Founded in 1991, this populist party refers to the model of the Italian Lega Lombarda. It defends national conservative and isolationist positions and is one of the major parties in the Canton Ticino. With their two seats in the National Council they belong to the Swiss People's Party faction.

Movement of the Citizens of French-speaking Switzerland (Mouvement des Citoyens Romands, MCR) ==> Far right

In 2005, a member of the Swiss People's Party and a former member of the Liberal Party founded the (local) patriotic protest party "Mouvement des Citoyens Genevois". After their first appearance in national elections in 2007 in the canton of Geneva, in 2011 they participated also in the canton of Vaud.

They bring forward anti-foreigner positions, especially against frontier workers from France. Contrarily, they take traditionally leftist stances in social welfare discourses. They are represented by one seat in the National Parliament, without belonging to a faction.

Solidarity ==> Far left

Solidarity is an anticapitalist, ecologist and feminist party, present in French-speaking Switzerland, in the cantons of Geneva, Vaud, Neuchâtel and Fribourg, as well as in the German Swiss canton of Basel. Solidarity refers to the anticapitalist, ecologist and feminist left. The organization advocates a revolutionary transformation of the society based on socialist bases and democratic values.

The party invests a lot into social movements; its members militate actively in labor unions, in diverse associations of the labor movement, in anti-globalization movement and are active in many other activities in relation with the class struggle. In Switzerland, Solidarity is a party associated with the Labour party (POP-PST).

WEIGHT – Weighting factor

Please report on whether you calculate any weighting variables. If you adjust for non-response bias, please enter the variable(s) on which the sample's distribution(s) is (are) adjusted to the population distribution(s). Please, also report if you apply any kind of rescaling.

Design weight to adjust for unequal selection probabilities	No	
	<u>Yes</u>	[] The sample frame is individual based and the sampling is pure random, so that every resident in Switzerland has equal chance to participate
Weight to adjust for non-response bias	<u>No</u>	[X]
	Yes	[] → <input type="checkbox"/> please specify variables used for calculation of weight
Are the final weights rescaled to net sample size (thus weighted sample size=unweighted sample size)?	No	[] → <input type="checkbox"/> please specify target population represented by sum of all case weights
	<u>Yes</u>	[X]
Note	all weight=1, according to the sample design (all respondents have the same probability to be selected)	

Construction/Recoding:

Country Variable Codes/Construction Rules	→ WEIGHT
	1. design weight with all have the same probability of inclusion

MODE – Administrative mode of data-collection

<i>Note</i>	All questionnaires have been administrated F2F/ CAPI with showcards
