ISCO08 - Occupation ISCO 2008

Please give the text of the source question(s) on the respondent's occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [-8] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

SPISCO08 – Spouse, partner: occupation ISCO 2008

Please give the text of the source question(s) on the respondent's spouse occupation used in your field questionnaire. If ISCO08-codes are not coded directly from the responses, but derived from a country-specific occupation coding scheme, please provide a table of correspondence between country-specific and ISCO08 codes *attached as a separate file*. Also when you derive ISCO08 from another ISCO scheme, such as ISCO88, ISCO-COM (a variant developed for the European Union (EU)), or ISCO88-CIS developed by the Statistical Committee of the Commonwealth of Independent States, please document the source code and provide a correspondence list.

Please do **not** enter **standard** ISCO08 codes here, but report any deviations. **However, please note that country-specific codes, which are not part of the ISCO coding scheme cannot be accepted!**

Occupations should be coded on the 4-digit level of ISCO08. Occupational area 0 (Armed Forces occupations) needs some special attention. Since the ISCO variable is numeric, 4-digit codes starting with zero, such as 0110 will usually appear as 110 in the data file. It is therefore suggested that the only valid 3-digit codes in the data file are those armed forces occupations 110, 210 and 310.

In some special cases information concerning the occupation may be insufficient for 4-digit coding. Instead of coding these cases as [-8] "inadequately described" use 3-digit coding. In those very special cases where 3-digit coding is applied, fill in a zero for the missing digit. Example: code 131 is coded as 1310.

<i>Interviewer Instruction</i>		
<i>Translation Note</i>		
<i>Note</i>	<p>Today, Icelandic legislation has two basic structures that govern adult relationships. One is marriage and the other is cohabitation.</p> <p>The Marriage Act has been gender-neutral from 2010 and applies to both same-sex and opposite-sex couples. Before the Marriage Act became gender-neutral, in the period 1996-2010, the Act on Registered Partnership (staðfest samvist) existed in Iceland for same-sex couples which granted similar rights to marriage. People who entered into registered partnership could after the new marriage laws were passed in 2010 decide whether they wanted to remain in registered partnership or change their relationship status to marriage.</p> <p>In Iceland couples can register their cohabitation (skráð sambúð) which gives them some legal rights. This legal form for partnership is very common in Iceland. Frequently the categories registered partnership (staðfest samvist) and registered cohabitation (skráð sambúð) are confounded which can for instance be seen in survey results that show that a very high proportion of respondents report that they are in registered partnership (same-sex relationship) because they believe the answer category applies to registered cohabitation. Because of this common misunderstanding, and because now there only exists a gender-neutral marriage act we chose to not use category 2 (civil partnership for same-sex couples) and instead added category 7: registered cohabitation (for both opposite-sex and same-sex couples).</p> <p>By mistake we used ‘civil partnership’ as the English translation of the category registered cohabitation. The data shows that there is an unusually high proportion of respondents that answered in English that reported to be in civil partnership, which leads us to believe that at least many of them understood the term as referring to registered cohabitation.</p>
