1.10 Introduction1

Translate from English to Setswana: INTRODUCTION: Good (morning/afternoon/evening), I'm ----- and we are conducting a survey for the Human Sciences Research Council (HSRC). The HSRC regularly conducts surveys of opinion amongst the South African population. Topics include a wide range of social matters such as communications, politics, education, unemployment, the problems of the aged and inter-group relations. As a follow-up to this earlier work, we would like to ask you questions on a variety of subjects that are of national importance. To obtain reliable, scientific information we request that you answer the questions that follow as honestly as possible. Your opinion is important in this research. The area in which you live and you yourself have been selected randomly for the purpose of this survey. The fact that you have been chosen is thus quite coincidental. The information you give to us will be kept confidential. You and your household members will not be identified by name or address in any of the reports we plan to write.

4.6 AssentInformation

Translate from English to Setswana: INTERVIEWER: Read the below to the parent of the respondent chosen. PARENTAL PERMISSION/CONSENT FOR CHILD RESPONDENT (16-17 YEARS) Who we are Hello, I am ----- I am from the Human Sciences Research Council and our organisation is asking people in South Africa and in your community to answer questions, which we hope will benefit South Africans in the future. What we are doing We are conducting a national survey which aims to determine the publics attitudes, beliefs, behaviour patterns and values with regard to various important issues affecting South Africa. We run this survey every year to see how these attitudes are changing over time. The questionnaire covers a wide range of topics, with examples including attitudes about democracy and governance, service delivery, race relations, crime, moral issues, family issues and poverty. No special knowledge is needed to answer any questions. Permission for your childs participation Your child is invited to take part in the research study to help us understand the attitudes and views of South Africans. We have chosen your child as a possible participant in the study because we are stopping at approximately every 10th household in this neighbourhood and asking one selected person older than 16 years in each to respond to some questions. We are doing this in 500 different areas around the country and in each area we are interviewing a person from 21 different households. This means that a total of 10 500 people will be interviewed as part of this study. Within each household, one person is selected to be interviewed from among household residents. All individuals in a household have an equal chance of selection and ensure that we get a representative picture of people in South Africa. We cannot therefore substitute any person or household. Since your child is younger than 18 years, we must have your permission to include him/her in the study. If you decide to allow your child to participate in this research study, your child will be asked to decide whether he/she wants to take part. The interview will last between 60 and 90 minutes. Please understand that participation is voluntary and you and your child are not being forced to take part in this study. The choice of whether to participate or not is yours and your childs alone. If you or your child chooses not to take part, you will not be affected in any way whatsoever. If you agree to participate, he/she may stop me at any time and tell me that he/she does not want to go on with the interview. If this happens, your child will not be negatively affected in any way. Confidentiality The information provided by your child will remain confidential. This means that his/her name and address will not be linked to the answers provided. Nobody will be told that you took part in this study. We study and report on the answers given by all the people we interview and not on an individual basis. All identifying information will be kept in a locked file cabinet or office and will not be available to others and will be kept confidential to the extent possible by law. The records from your participation may be reviewed by people responsible for making sure that research is done properly, including members of the ethics committee at the Human Sciences Research Council. (All of these people are required to keep your identity confidential.) Otherwise, records that identify you will be available only to people working on the study. Once your answers are computerised it will be stored electronically in a secure environment and used for research or academic purposes now or at a later date in ways that will not reveal who you are. We will not record your name electronically anywhere and no one will be able to connect you to the answers you give. Risks/discomforts At the present time, we do not see any risks to your childs participation. Benefits There are no immediate benefits to your child from participating in this study. However, this study will be extremely helpful in finding out more about how much or how little people in the country share the same views and beliefs. This will allow us to make useful recommendations to the relevant authorities and organisations. Who to contact if you have been harmed or have any concerns This research has been approved by the HSRC Research Ethics Committee. If you have any complaints about ethical aspects of the research or feel that your child has been harmed in any way by participating in this study, please call the HSRCs tollfree ethics hotline 0800 212 123 (tollfree when phoned from a landline from within South Africa) or email research.ethics@hsrc.ac.za If you (or your child) have concerns or questions about this study please feel free to contact the project coordinators Mr. Benjamin Roberts at 031 242 5606 or Mrs. Jarè Struwig at 012 302 2511.

4.7 AssentAgreement1

Does the parent assent?

Expects a single option response (required)

Yes [1]

No [2]

Branches

If response Equals 'No [2]' then skip to *ThankYou* (17.2)

4.8 AssentSignature

I hereby agree to allow my child to participate in this research on public attitudes. I understand that my childs participation is completely voluntary and that the child is not being forced in any way to take part. I also understand that I can stop this interview at any point should I not want my child to continue and that this decision will not in any way affect me or my child negatively. I understand that this is a research project whose purpose is not necessarily to benefit the child personally in the immediate or short term. I understand that the information collected during this research project will be recorded, stored electronically in a secure environment and used for research purposes now or at a later date. I understand that this consent form will not be linked to the questionnaire, and that my personal information will remain confidential. I have received the telephone number of a person to contact should I need to speak about any issues that may arise in this interview.

4.9 ConsentInformation16to17

INTERVIEWER: Read the below to the respondent chosen. ASSENT FORM FOR ADOLESCENT RESPONDENTS (16-17 YEARS) Who we are Hello, I am ----- I am from the Human Sciences Research Council and our organisation is asking people in South Africa and in your community to answer questions, which we hope will benefit South Africans in the future. What we are doing We are carrying out a study across the country on what people think about various important issues affecting South Africa. We do this study every year to see how these attitudes are changing over time. The questions we ask cover a wide range of subjects, including attitudes about democracy, government, service delivery, crime, moral issues, family issues and poverty. Your participation You are invited to take part in the research study to help us understand the attitudes and views of South Africans. You were chosen to take part in the study because we are stopping at approximately every 10th household in this neighbourhood and asking one selected person older than 16 years in each of these households to respond to some questions. We are doing this in 500 different areas around the country and in each area we are interviewing a person from 14 different households. This means that you would be one of 7000 people selected to be interviewed as part of this study. Your parent/guardian knows we are going to ask you to take part in this project and has given their permission. Please understand that your participation is voluntary and you don't have to take part in this study if you don't want to. You don't have to participate even if your parent has agreed. The decision is yours alone. If you choose not to take part, you will not be affected in any way. If you agree to take part in the study, you may stop me at any time and tell me that you don't want to go on with the interview. If you do this, there will be no bad feelings. The interview will last between 60 and 90 minutes. I will be asking you questions and ask that you are as open as possible in answering these questions. Some questions that we ask, for instance about family violence and violence in the house, may be a little personal or sensitive. Please remember that this information will not be given out to other people. I will be asking some questions that you may not have thought about before. We know that you cannot be absolutely sure about the answers to these questions, but we ask that you try to think about these questions. When it comes to answering questions there are no right and wrong answers. Confidentiality All the information you give us will remain confidential. This means that your name and address will not be linked to the answers you give. Nobody will be told that you took part in this study. All identifying information will be kept in a locked file cabinet or office and will not be available to others and will be kept confidential to the extent possible by law. We will not record your name electronically anywhere and no one will be able to connect you to the answers you give. Risks/discomforts We do not see any risks in your taking part in the study. Benefits There are no immediate benefits to you from taking part in this study. However, this study will be very helpful in learning more about how much or how little people in the country share the same views and beliefs. This will allow us to make useful recommendations to the government and other organisations about various issues, including service delivery, race relationships, education, confidence in the police and courts, and about families in South Africa and how they function. Who to contact if you have been harmed or have any concerns This research has been approved by the HSRC Research Ethics Committee. If you have any complaints about ethical parts of the research or feel that you have been harmed in any way by taking part in this study, please call the HSRC's tollfree ethics hotline 0800 212 123 (tollfree when phoned from a landline from within South Africa) or contact the Human Sciences Research Council REC Administrator on Tel 012 3022012 or email research.ethics@hsrc.ac.za. If you have concerns or questions about this study please feel free to contact the project leaders Mr. Benjamin Roberts at 031 242 5606 or Mrs. Jarè Struwig at 012 302 2511.
